

Franck Vigroux Live Technical Rider

These are the minimum technical requirements to ensure a great sound and performance. If you have a problem meeting any of our technical requirement feel free to contact us immediately to discuss.

SOUND SYSTEM

A 3 way active (tri-amped) sound system, in stereo, capable of 110 dB constant at mix position without distortion and fully covering the audience area. Components should include a 18" driver for low frequency, a 15" driver for mids (NEXO PS15, L.ACOUSTICS, MTD115...), and a 1" or 2" compression driver for high frequency. The system loudspeakers must be configured as a Left/Right stereo pair; center clusters, balcony fills etc. are fine providing they are an addition to the main L&R speakers - any such additions should be independently controllable from the mix position...

The sound board, lighting desk and a video projector will be placed in the middle of the venue.

The promoter allows the production crew to determine the location of their equipment.

Sound system should be in place and functional at the time of the band equipment load in.

We will need a qualified sound engineer before and during the show.

SOUND CHECKING

Sound check time should be 2hrs before doors open. Average sound check time is 1 hour. This should be completed (including Lighting) ONE hour before doors open to allow time for the group to prepare for the performance.

TECHNICAL REQUIREMENTS

1 stage platform : 2,5 meters x 1 meter

Sound

Two (2) XLR line

Two (2) stereo monitors on Two (2) different mixes.

BACKLINE

One desk lamp with white light!!
